

— FABRICUT® —
DESIGN INSPIRATION

three distinct spaces featuring Fabricut's newest collections

modern

a boho.

simple. layered.

relaxed.

This room was designed to showcase Fabricut's warm, textural and tribal inspired fabrics and trimmings. Our designers created a modern boho living space with earthy-neutral tones and layered textures.

By using clean-lined, modern furniture pieces alongside a classic sofa profile, we were able to incorporate many different textures and patterns into this one room - creating a cohesive and relaxed space.

femin

ine.

fresh. chic.

bright.

With this room our designers wanted to create a bright, fresh and feminine take on a breakfast nook. The ikat pleated shade helps pull this color palette together for a timeless look.

We incorporated trendier elements, like the tufted banquette and flat roman shades, into this design while creating a space that was both usable and bright.

new track

ditional.

warm. inviting.

textural.

Our designers were inspired by the colors of the Southwest for this inviting, new traditional living room. Using muted shades of more traditional colors – red and blue – updates this space and provides a broader palette that could work in almost any environment.

We love how this scheme pairs patterns with textures, a desert-inspired palette with pops of fresh color, and trimming details to create warm and welcoming space.
