
Designer Roller Shades

Designer Screen Shades

Skyline® Panels

HunterDouglas

Fashion Leader

Designer Roller Shades, Designer Screen Shades and Skyline® Panels bring to market the largest fabric collection in the industry.

- Bold prints and patterns, bright colors and a fresh mix of designer looks provide endless design possibilities.
- Offered in sheer to opaque opacities in Designer Roller Shades and Skyline Panels and 14% to 0% openness factors in Designer Screen Shades and Skyline Panels.
- Roller Fabrics—Select an opacity to fit your light and privacy control needs. Fashion-forward collection featuring beautiful textures, bold prints and color. Use Roller when having both style and light control are the key objectives.
- Screen Fabrics—Provide UV protection, glare control and the opportunity to maintain views. Select from an openness factor that fits the need to block UV rays while preserving view-through or having privacy. Perfect to help protect furniture, flooring or art.

Unmatched Innovation

Choose from proprietary systems that operate shades with ease.

Custom Clutch

This standard continuous cord control operating system features customized lift technology for smooth operation and ease of lifting.

UltraGlide® Operating System

The retractable cord stays at a constant length after raising and lowering the shade for enhanced child and pet safety.

LiteRise® Operating System

Offers the ultimate in cordless operation and ease of operation. Simply push to raise or pull down to lower.

Cordless

Cordless operating system that requires a "jog" of the shade to unlock it and then position it at any height.

PowerView® Automation

PowerView Automation allows users to transform the light and mood throughout a home with the simple push of a button or tap on a mobile device. Through the latest innovations, synchronizing Hunter Douglas window treatments with the rhythm of life has never been easier. Power source options range from battery to hard-wired.

SoftTouch™ Motorization

Motorized operating system designed for simple, intuitive wand-controlled shade operation. Gently pull wand down to lower shade; push up to raise. Superior child safety with absolutely no exposed cords.

Duolite® Shade with PowerView Automation

Motorized operating system that brings the ultimate in light and privacy control. Select a beautiful and decorative sheer, semi-sheer or 10% openness factor fabric for the front shade coordinated with a color-coordinated room-darkening lining to have view-through or privacy.

Custom Clutch

Standard proprietary operating system

Superior Performance

- Two clutch sizes to accommodate all shade sizes
- Customized spring system based on each individual shade provides an efficient lifting experience. Offering ease of lifting, no matter the shade size.

Refined Functionality

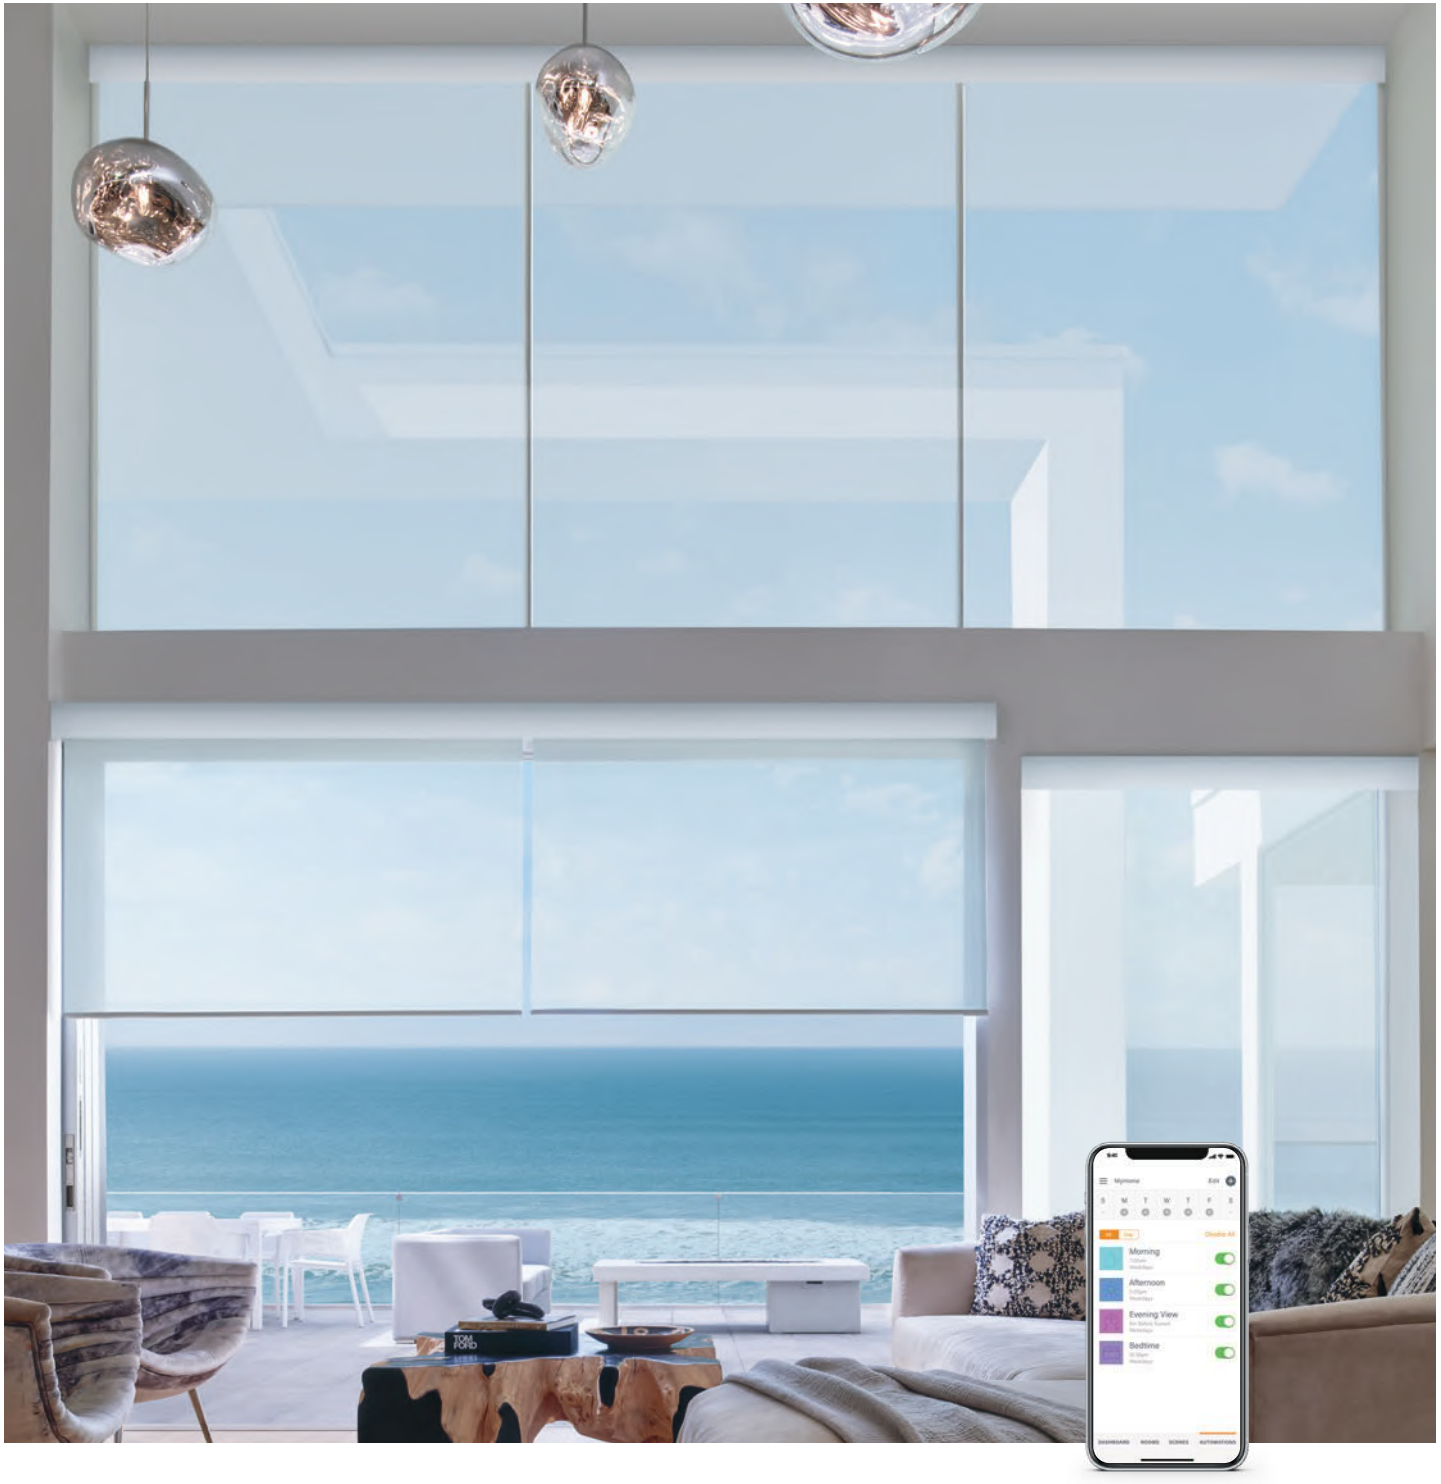
- Engineered to provide even light gap on the operational side and non-operational side
- Minimal light gap for increased privacy and light control

Sleek, Contemporary Design

- Standard bracket features nine designer bracket cover colors to coordinate with all fabrics. Standard on outside mount, optional on inside mount.

Enhanced Style

- Upgrade to the Designer Metal Bracket for a sophisticated style statement
- Available in two designer metallic colors, Pearl Chrome and Burnished Chestnut



PowerView® Automation

- Modern design with advanced technology
- Utilizes the same bracket cover as the Custom Clutch, so it has a very similar look
- Longer heights on select fabrics; up to 180" for Designer Screen fabrics and 132" for Designer Roller fabrics
- Accurate position of the shade throughout its entire range of motion
- The light gap is even on both sides of the shade.
- Available with reverse roll
- Available with Dual Roller bracket
- Available with Fascia and Pocket
- Available with all Cassettes
- Available with variety of power source options ranging from battery to hard-wired

Rechargeable Battery Wand

- To increase energy efficiency and sustainability, power your shades with the rechargeable battery wand.
- This power solution is not only environmentally friendly, but also provides longer battery life and improved performance.

PowerView® Automation

PowerView+™ Automation

- PowerView+ is a premium control option in the PowerView family that utilizes a wired connection to both power and control PowerView window treatments.
- Utilizes the PowerView® Hub and PowerView App to provide a familiar, high-performance experience
- Employs wired commands for added reliability.
- Ultra quiet operation for peaceful performance
- Plug-in power source ensures there is no need to change batteries.
- Right- and left-hand motor control options
- Operate shades up to 156" x 180"
- Available with Bracket, Standard Roll, Reverse Roll, Fascia, Large Square Cassette and Pocket top treatments

PowerView AC Hard-Wired Automation

- PowerView with AC hard-wired utilizes your home's AC power installed at the window for a wired connection for power.
- PowerView enabled; RF communication
- 120V AC motor; supplied with 8' power cord (no plug)
- Utilizes the PowerView Hub and PowerView App to provide a familiar, high-performance experience
- Right- and left-hand motor control options
- Operate shades up to 156" x 180"
- Available with Bracket, Standard Roll, Reverse Roll, Fascia and Pocket top treatments
- Available with coupled shades; max width = 240", max height = 180" (varies by fabric)

Light Control and Privacy

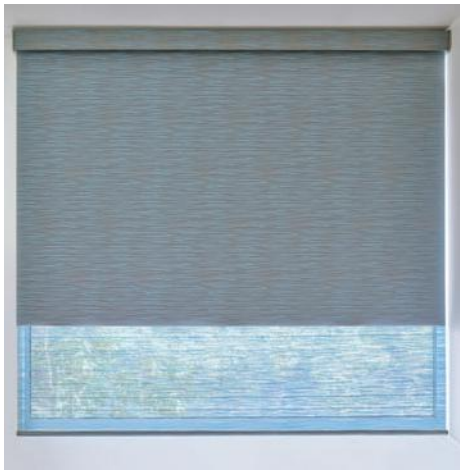
An extensive fabric collection gives you the ability to control light.

Designer Roller Shades and Designer Screen Shades

- Fabrics organized by opacity or openness, allowing consumers to choose a fabric that best fits their lifestyle
- Opacities range from sheer to opaque and 14% to 0% openness.

Blockout System

- Innovative side and sill channels eliminate light gap. Available in all 9 hardware colors.
- Select from Designer Roller or Designer Screen Shades fabrics.
- Choose from 28 maximum room-darkening fabrics in the Designer Roller collection for the best light blockage when used with the Blockout system.
- Available with Custom Clutch and PowerView® Automation with Large Square Cassette or Fascia top treatment



Duolite® Shade

One Shade Solution—the best of both worlds to control light and create privacy. The Roller Duolite® Shade combines a sheer or semi-sheer fabric with a room-darkening liner in a single shade.

- Single mounting profile works in many mounting situations.
- Select a beautiful and decorative sheer or semi-sheer fabric or 10% Screen fabric for the front shade. Room-darkening liner is color coordinated to match the custom hardware colors and preselected to best coordinate with each fabric.
- Once the front shade is completely lowered, the back liner can be adjusted to achieve varying levels of light control and privacy.
- The back liner features a neutral streetside to provide exterior uniformity with a custom-colored face to enhance the color saturation of the decorative front fabric.
- Available with the PowerView® system
- Available with Large Square Cassette

Dual Roller Shade

The ultimate in light control and privacy.

- Two shades in one window
- Combines fabrics with different opacities for varying levels of light control and privacy
- Each shade operates independently to control light and privacy to preferred setting.
- Bracket version available with Custom Clutch or PowerView® Automation
- Large Cassette version available with Clutch system only

Skyline® Panels

Offers clean lines and a sleek contemporary look.

- Minimal stackback for maximized view-through
- Skyline® Panels are available in:
  - 109 of 111 fabrics in the Designer Roller Shades collection
  - 64 of 67 fabrics in the Designer Screen Shades collection
- Perfect for large window expanses such as a sliding door or small windows as well
- Great used as a room divider
- Designer Roller and Designer Screen Shades in combination with Skyline Gliding Window Panels gives The Whole House Solution™ which helps coordinate products for windows requiring both vertical and horizontal applications in the same room.

Skyline® Panels
Patented Hardware

Features

- Patented two-channel track system allows an infinite number of panels to attach to the slim 2½" headrail.
- Two panel widths promote uniformity, 11½" and 17".
- Innovative, interlocking bottom weight prevents panel from tangling and adds panel stability.
- Unique fabric-hanging system provides a tailored look.

Finishing Touches

Finish shades in style with a variety of top and bottom treatments.

Color Coordination

- Hardware available in nine custom colors, preselected to coordinate with each fabric
- Select a unique combination for a customized look.

Top Treatments

- Options for roller shades include Cassette, Fascia, Pocket or the Fabric Valance
- Skyline® Panels available with Cassette, Sleek Metal Valance, Fabric Valance or Box Valance

Bottom Treatments

- For roller shades choose from a standard bottom bar, flat bottom bar or a sealed hem (screen fabrics only).

Complementary
Fabric Valance

Contrasting
Fabric Valance

Endless Possibilities

Complete the look in a room with the stand-alone fabric valance.

Fabrics

- Coordinate with a contrasting fabric from the Designer Roller or Designer Screen Shades fabrics.
- Pair with any Hunter Douglas product to add color, pattern or texture.

Superior Construction

- Two fabric layers—one layer of face fabric and one layer of lining, wrapped around a ½" thick lightweight board.
- Fabric-wrapped returns standard with outside mount. Standard return sizes: 1½", 4" and 6".
- Custom returns available from 2" to 8", in ½" increments.

The Whole House Solution™

Multi-product styling at its best.

Complete Coordination

- Choose two product styles, either Designer Roller Shades + Skyline® Panels or Designer Screen Shades + Skyline Panels.
- Coordinate a single room or an entire home in the same fabric.

Patio Shades

Ideal for covered outdoor spaces, including porches, sunrooms or patios.

Features

- Available with select screen fabrics
- Each shade features stainless steel components for trouble-free operation.
- Available with Large Cassette
- The Patio Shade Cable Guide System is designed to secure the shade in an outdoor application.
