Screen Shades & Skyline® Panels

BEFORE

AFTER

Fabric Umbria 5% **Color** Pebble **Operating System** PowerView® Automation **Deck** 2
Design Studio™ **Side Panels** **Fabric** Spencer **Color** Stone **Liner** Room-Darkening

Fabric Panama 5% **Color** Cotton **Operating System** PowerView+™ Automation **Deck** 2

Screen Shades reach new heights
and widths to expand your view.

Today’s smart homes demand integrated communication systems. PowerView+™ Automation is a premium control option that uses a wired connection to both power and control window treatments.

Fabric Palette 5% **Color** Tundra **Operating System** PowerView+™ Automation **Deck** 2

Fabric New Orleans 10% **Color** Wrought Iron **Operating System** PowerView® AC Automation **Deck** 1

Coupled Shades with PowerView® AC Hard-Wired Automation reach even greater widths.

Screen Shades provide
UV protection for your floors,
furniture and art work.

Fabric Broadway 3% **Color** Marble **Operating System** PowerView® Automation **Deck** 3

Fabric Abyss 0% **Color** Volcanic Ash **Operating System** PowerView+™ Automation **Deck** 6

Rest easy, Screen Shades can block the light outside to create the calm inside.

PowerView® Automation makes it easy to control the view and create privacy with the touch of a button.

Fabric Empire 3% **Color** Fence Post **Operating System** PowerView® Automation **Deck** 3

Simply stated, Patio Shades enhance outdoor living.

Fabric Empire 5% **Color** Gray Mist **Operating System** Patio Shades Clutch **Deck** 1

Skyline® Panels expand your horizons, providing continuous coverage of even the largest window expanses.

Fabric Omni 10% **Color** Carbon **Operating System** Cord Control **Deck** 1

The Screen Duolite® Shade is a one shade solution. This unique proprietary system combines a 10% openness screen fabric with a room-darkening liner allowing you to control view-through while creating privacy.

Duolite® Shade Fabric New Orleans 10% **Color** French Quarter, Duchess Grey Liner **Operating System** PowerView® Automation **Deck** 1

Front Shade **Fabric** Ashton 10% **Color** Moonlight **Operating System** PowerView® Automation **Deck** 1
Back Shade **Fabric** Agora 0% **Color** Hadrian Wall **Operating System** PowerView® Automation **Deck** 6

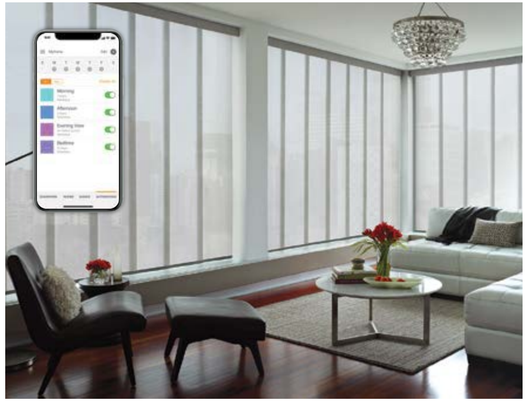
The Dual Roller shade allows you to combine two screen shade fabrics with different openness factors in one window, giving you endless options for light control and privacy.

Use the same fabric for Screen Shades and Skyline® Panels for high style and performance for both doors and windows in the same room.

There is a difference in Screen Shades and that difference is Hunter Douglas.

Wide Widths & Long Heights

The ultimate in coverage for today's larger windows. Expansive shades provide a minimal aesthetic while allowing you to control the view.



Superior Functionality

PowerView® Automation provides the ultimate for in-home automation allowing you to control every shade with the touch of a button. Power options range from battery-operated to hard-wired for both standard and low-voltage applications.

GreenScreen Sea-Tex™ Fabric

This collection features an exclusive fabric style made with recovered shoreline plastic. Hunter Douglas is proud to be part of a program that has reclaimed over 30 tons of washed ashore plastic from our oceans and turned it into screen fabric.

Screen Duolite® Shade

This unique and proprietary system features a 10% Openness face fabric in combination with a room-darkening liner as one complete shade. The liner is color-coordinated to the face fabric for a truly custom and cohesive look.

Fabric Performance

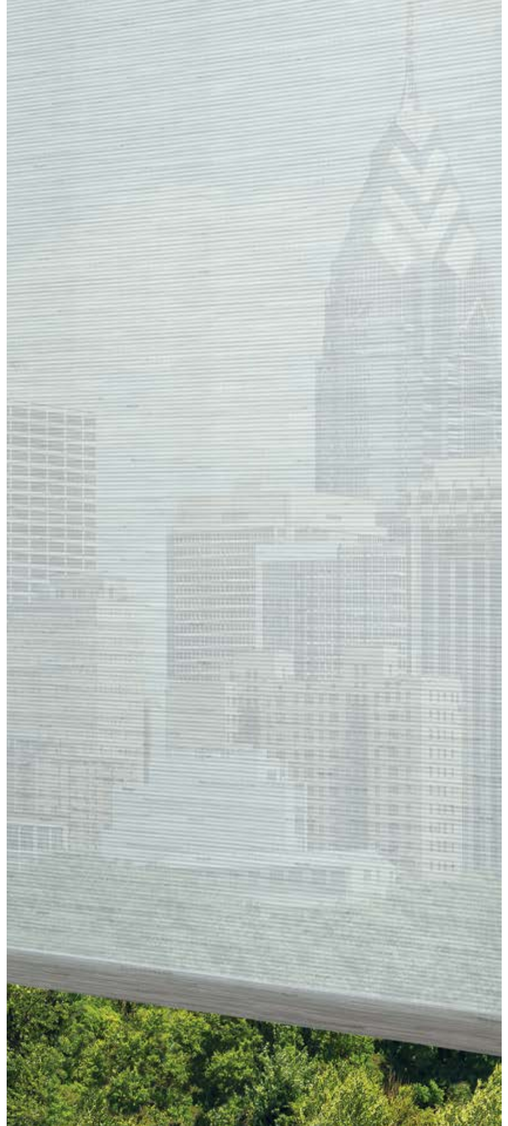
Screen fabrics are designed to provide the ultimate in light control and UV protection, protecting your furniture, flooring and artwork from damaging sun rays.

Product Versatility

Majority of fabrics in the collection are available as Screen Shades and Skyline® Panels providing a Whole House Solution™ for covering all window applications.

Designer Screen Shades Product Advantages

Product Attribute	Features	Consumer Benefit
Automation	PowerView® Automation features both wireless technology and hard-wired solutions for whole home automation.	Operates shades with a touch of a button or tap of a mobile device. Multiple power source options available to fit each unique application and allow for smart home communication.
Proprietary Operating Systems	Custom Clutch	Provides shade-to-shade lift uniformity and a minimal light gap that is even on both sides.
	LiteRise®	Cordless system offers enhanced safety and stops at any point.
	UltraGlide®	Single retractable cord option for ease of operation and enhanced safety.
	SoftTouch Motorization™	Wand controlled motorized operation for simple control.
Performance Fabrics	Screen Shade fabrics naturally provide UV protection and glare control.	Reduced glare and reduced heat gain provides comfort in the home. All fabrics are GREENGUARD Indoor Air Quality certified.
	GreenScreen Sea-Tex® Fabric	Do something good for the environment; this exclusive fabric is made from recovered shoreline plastic.
Screen Duolite® Shade	Combines a 10% openness fabric with a room-darkening liner in a single shade.	The room-darkening liner can be positioned as needed providing privacy and additional light control to a 10% openness fabric.
Dual Roller	2 Shades in 1 Window, independently operated.	Control the light and view by combining fabrics with different openness factors and adjusting each shade individually.
Patio Shade	Stainless steel components and weather resistant fabrics for outdoor use.	Ideal for covered patios, porches and sunrooms to maintain view-through and provide UV protection.
Top Treatments	Square Cassette, Fascia, Pocket, Dust Cover Valance and Fabric Valance.	Customize the look of your shade by selecting from various top treatments. With the fabric valance, create a coordinating or contrasting look by selecting fabric from either the Designer Screen or Designer Roller collections.
Bottom Treatments	Standard Bottom Bar, Flat & Sealed Hem.	Choose fabric-wrapped or unwrapped in one of 9 Custom Hardware Colors.
Design Options	Custom Hardware Colors.	Color is preselected to best coordinate with fabric.
	Magnetic Hold-Down Brackets.	Maintain the shade's position when fully closed.
Whole House Solution™	Majority of fabrics available in both Screen Shades and Skyline® Panels.	Utilize the same fabric in both Screen Shades and Skyline® Panels for window and door applications in the same room.



Skyline® Panels Product Advantage

Product Attribute	Features	Consumer Benefit
Headrail	Patented 2 channel track system allows an infinite number of panels to attach to the slim 2 ½" headrail.	Track size and number of channels does not increase like competitive programs where the track and channels grow based on window width.
	Sleek European styling profile.	Sleek profile provides perfect fit for every window.
Bottom Weight	Patented interlocking system.	Prevents panels from tangling while being traversed and adds panel stability.
Fabric Hanging System	Innovative fabric hanger features flexible flat rod.	Locks fabric securly in place while providing a tailored look.
Fabric Collection	Comprehensive fabric collection.	Largest, most unique and robust collection of fabrics on the market.
Panel Widths	11 ½" and 17".	Provides uniformity.
Panel Stack Back	Minimal stack back.	Provides maximum view-through.
Automation	PowerView® Automation features wireless technology for home automation.	Operate shades with a touch of a button or from any mobile device.
Design Options	Custom Hardware Colors.	9 hardware colors to coordinate with all fabrics.
Whole House Solution™	Majority of fabrics available in both Skyline® Panels and Screen Shades.	Utilize the same fabric in both Skyline® Panels and Screen Shades for window and door applications in the same room.

Openness, Color and View

Openness is the weave density of screen fabric that affects visibility, privacy and glare control, while providing UV protection. Fabric color affects view-through.

Light Color Fabrics

White Fabrics: Empire Fence Post

- Light is filtered, providing a softer view-through while preserving natural light.
- Reflects light, allowing less heat gain in a room, providing great energy efficiency.
- Blocks harmful UV rays that can discolor furniture, flooring and art work.

Openness 10% Most View – Least Privacy

UV Blockage: 90%
Daytime View: Softer Focus
Privacy: Negligible

Openness 5% Moderate View – Some Privacy

UV Blockage: 95%
Daytime View: Softest Focus
Privacy: Moderate

Dark Color Fabrics

Dark Fabrics: Empire Dark Chocolate

- Provides a crisp view-through the shade.
- Absorbs light and heat gain at the window for energy efficiency.
- Offers superior glare control by reducing visible light that comes through the fabric.

Openness 10% Most View – Least Privacy

UV Blockage: 90%
Daytime View: Sharp Focus
Privacy: Limited

Openness 5% Moderate View – Some Privacy

UV Blockage: 95%
Daytime View: Diffused Focus
Privacy: Average

Openness 3% Some View – More Privacy

UV Blockage: 97%
Daytime View: Limited Focus
Privacy: Increased

Openness 1% Least View – Most Privacy

UV Blockage: 99%
Daytime View: Minimal
Privacy: Maximum

View In

The view from outside to inside at night varies by fabric color, openness factor, lighting outside and inside the room. Consider this unique aspect of screen fabric when making selection.

Openness 3% Some View – More Privacy

UV Blockage: 97%
Daytime View: Minimal Focus
Privacy: Improved

Openness 1% Least View – Most Privacy

UV Blockage: 99%
Daytime View: Minimal
Privacy: Maximum

Screen Fabric Performance

Screen fabrics are designed to perform at the window. Providing glare control, UV protection and enhanced energy efficiency.

Solar Optical Properties

Screen fabrics protect your home from the sun's heat and glare. The following categories measure the solar properties screen fabrics provide.

Solar Transmittance (Ts)	The amount of solar energy that passes through the shade – the lower the number, the higher the performance at reducing solar energy.
Solar Reflectance (Rs)	This rating measures the amount of heat reflected away from the window – a higher number means the shade performs well at reflecting solar energy.
Solar Absorption (As)	The absorption of light and heat, a low number means the shade absorbs little solar energy.
Visible Light Transmittance (Tv)	The percentage of light radiated through the fabric – the greater the number the less light that passes through the shade.

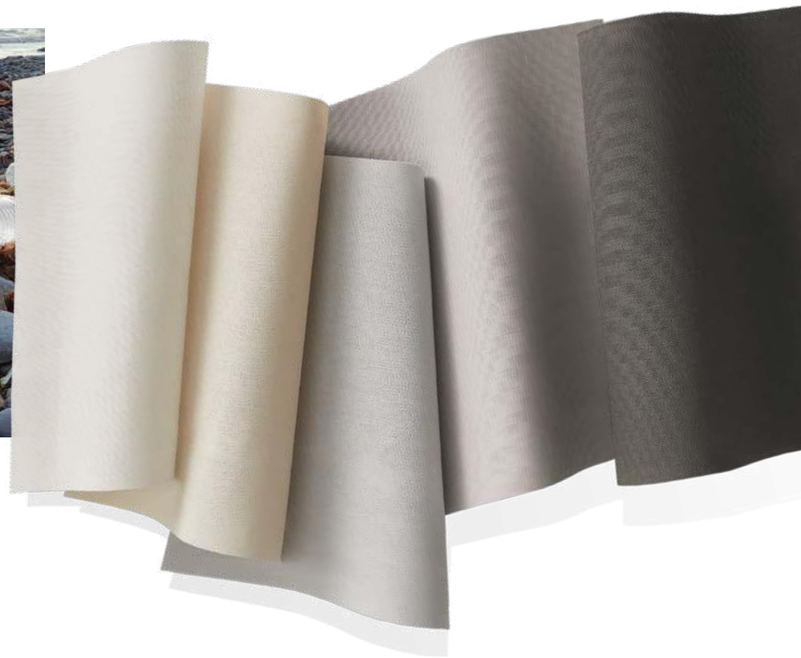
Some of the fabrics in this collection have been rated using the categories above and this information is provided on the back of the style decks.

Light Fabrics Reflect Light And Lower Heat Gain
When solar heat is reflected, it lowers a room's temperature resulting in a more balanced environment and reduced cooling costs.

Dark Fabrics Absorb Light
Dark fabrics allow the shade to reduce glare in a room and provide a crisp view-through.

Metalized Backing Reflects Sun Light
Flux 3% with metalized backing reflects up to 80% of the solar energy for improved thermal comfort and glare control, while maintaining a clear view-through. Style shown: Flux 3%, Deck 3.

GreenScreen Sea-Tex™,
fabrics made with recovered shoreline plastic.



The ocean currents have formed giant collection areas for plastic waste. It is estimated that 9 million tons of plastic waste are dumped into the world's oceans every year creating floating hazards, killing sea animals. Hunter Douglas is proud to be part of a program that has reclaimed over 30 tons of washed ashore plastic and turned it into Sea-Tex Fabrics. Our ocean is our future, help us to protect it.

Fabric Barista 1% **Color** White Mocha **Operating System** PowerView® Automation **Deck** 5

Majority of fabrics in the collection are available as Screen Shades and Skyline® Panels providing a Whole House Solution™.

Minimal yet sophisticated, Screen Shades roll up to provide a seamless look at the window.

Fabric Palette 5% **Color** Tundra **Operating System** PowerView+™ Automation **Deck** 2

Patio Shades

Bring the beauty from within, out! Ideal for covered outdoor spaces. From porches to sunrooms to covered patios, Patio Shades allow for view-through while providing ultraviolet protection.

Patio Shade Screen Fabric
Maintain the view-through while providing UV protection. Durable and easy to clean, these fabrics are made from weather resistant, vinyl coated fiberglass for years of enjoyment.

Clutch With Metal Bead Chain Standard
Features stainless steel components for smooth and trouble free operation. The easy to pull metal bead chain will not rust or tarnish in outside environments. Clutch is available in Black or White, bead chain in Nickel.

Cable Guide System Option
Designed to secure the shade, adding stability.

Hold Down Bracket & Cover
Attaches the cable to the wall or floor providing security with a polished, finished look. Available in Black or White.

Bottom Bar
Allows shade to effortlessly glide up and down the cable. Available in 9 Custom Hardware colors.

Screen Duolite® Shade
One Shade Solution

The Screen Duolite® Shade combines 10% openness fabric with a room-darkening liner in a single shade allowing you to control your view-through while creating privacy.

Photo identification on page 19

Screen Fabric Fully Lowered
Back Liner Not Lowered

Screen Fabric Fully Lowered
Back Liner Partially Lowered

Screen Fabric Fully Lowered
Back Liner Fully Lowered

The Screen Duolite Shade functions with the 10% openness fabric fully lowered. This fabric beautifully filters light and provides UV protection. When additional light control or privacy is needed, lower the room-darkening liner as preferred.

- Single mounting profile works in many mounting situations
- Offered in PowerView® Automation only
- Large Square Cassette only
- Available fabrics are clearly marked in Deck 1
- Room-darkening liner is color coordinated to match the custom hardware colors
- Liner colors are preselected to best coordinate with each fabric

Dual Roller
Two Shades, One Window

Combine screen fabrics with different openness factors. Each shade operates independently for the ultimate in view-through, light control and privacy.

Photo identification on page 20

Full Raised

Back Screen Fabric
Partially Lowered

Back Screen Fabric
Fully Lowered

Dual Roller Cassette

- Combine any two fabrics as individual shades in a single cassette
- Shades operate independently
- Available with Clutch operation only
- Single Large Square Cassette headrail

Dual Roller

- Combine any two fabrics as individual shades on a single bracket
- Fabric Valance suggested to cover mounting bracket and provide a finished look. Ordered separately from the Dual Roller Shade
- Shades operate independently
- Available with Custom Clutch and PowerView® Automation
- Single mounting bracket accommodates both shades

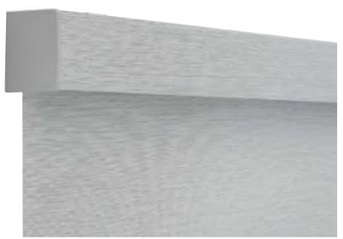
Top Treatments

Standard Roll Standard

Fabric rolls from the back, providing a minimal profile at the window. Roll direction can be specified on bracket only or with top treatment.

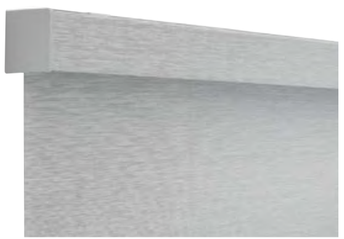
Reverse Roll Option

Fabric rolls from the front, providing a seamless flow of fabric from top to bottom. Roll direction can be specified on bracket only or with top treatment.



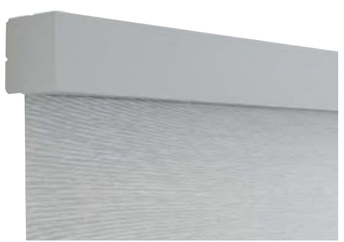
Large Square Cassette Option

Conceals the fabric roll behind a modern square cover, available either fabric-wrapped or in one of 9 Custom Hardware colors. Also available with Skyline for coordination.



Small Square Cassette Option

Conceals the fabric roll behind a modern square cover, available either fabric-wrapped or in one of 9 Custom Hardware colors.

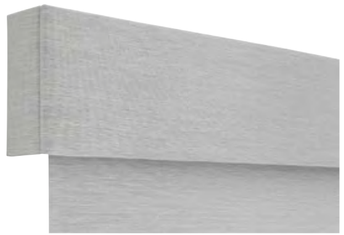


Fascia Option

The exposed metal fascia covers the fabric roll providing a sleek look. Color options include 9 Custom Hardware colors and Anodized. Available in 3" and 4" sizes.

Dust Cover Option

Full dust cover protects shade from dust and dirt while blocking outside light from filtering into the room. Rounded corner only.



Fabric Valance Option

Fabric-wrapped valance in 6 ½" or 8" height provides a clean profile at the window. Also available with Skyline for coordination. Shown: 8" valance.

Pocket Option

The fabric roll and operating system is completely enclosed and recessed into the ceiling. Color options White Tiara or Anodized.

Pocket

Example of pocket mounted inside window frame.

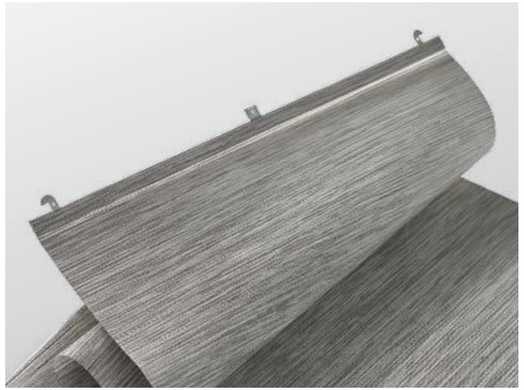
Skyline® Difference
Patented Hardware



Fabric Hanger
Designed for fabric stability while adding a tailored look. Unlike other systems, our fabric is wrapped over and attached to the hanger providing greater fabric stability. White only.

Bottom Weight
The innovative snap-on, snap-off system ensures stability and provides smooth operation. Available in 9 Custom Hardware colors.

Headrail
The dual-channel, single track design allows for an infinite number of panels to be installed on a single headrail. With other standard panel track systems, the number of tracks expand as the number of panels increase. Available in 9 Custom Hardware colors.
Headrail image on opposite page.

Panel Width

11 ½" Panel Default Less Than 56" Wide

17" Panel Default Greater Than 56" or Wider

Available exclusively in two panel widths, 11 ½" and 17". Panel widths are established based on size of your window.
Panel width can be selected so that all panels in various windows are the same.

Panel Stack

Left Stack

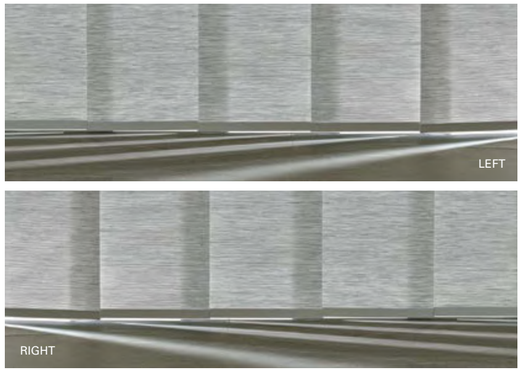
Split Stack

Right Stack

The minimal stack back provides maximum view-through. Stack back varies by shade size and panel width.
With an outside mount, the panels can stack on the wall, providing an unobstructed view.

Light Orientation

Panel Orientation

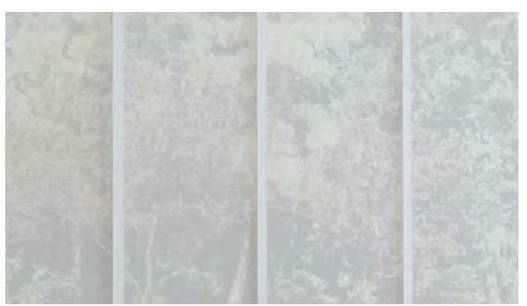


Bottom Light Direction

Control The Direction Light Enters The Room

Skyline® Panels hang diagonally on the headrail creating a slim profile and allowing light to gently filter into a room. Because the panels hang diagonally on the headrail, there is a slight light gap where the fabric panels overlap one another. A ⅞" space at the top of each panel tapers and narrows, reducing the light gap to almost zero at the midway point to the bottom where the panels are connected. To ensure maximum privacy, select either a left or right facing panel orientation for your installation.

Panel Overlap



Minimum Panel Overlap

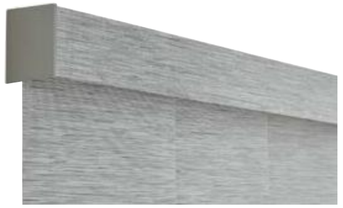
Maximum Panel Overlap

Based on the size of the window, the panel overlap can vary. The overlap will be more visible on sheer fabrics. Panel overlap cannot be specified.

Top Treatments

Headrail Standard

Slim 2 1/2" Headrail allows for an infinite amount of panels. Available in one of 9 Custom Hardware Colors.



Large Square Cassette Option

Conceals the track behind a modern square cover. Available either fabric-wrapped or in one of 9 Custom Hardware Colors.

Also available with Screen Shades for fabric coordination.

Sleek Metal Valance Option

Covers the headrail and the light gap between the panels and headrail. Available in one of 9 Custom Hardware Colors and 1 7/8" or 2 3/4" heights.

Box Valance Option

Perfect when used as a room divider or ceiling mount application. Available in one of 9 Custom Hardware Colors and 1 7/8" or 2 3/4" heights.

Fabric Valance Option

Fabric-wrapped valance in 6 1/2" or 8" height provides a clean profile at the window. Select any fabric for a coordinating or contrasting valance.

Shown 8" Fabric Valance

Fabric Valances are ordered separately from the shade.
Also available with Screen Shades for fabric coordination.

Fabric Barista 1% **Color** White Mocha **Operating System** PowerView® Automation **Deck** 5

PowerView® Automation with Screen Shades and Skyline® Panels smoothly integrates with other smart-home technologies for complete automation.

PowerView Automation

- Wireless operating system controlled via the PowerView® App or Pebble® Remote
- Automatic operation by programming Scenes and Automations
- Battery-operated, plug-in and hard-wired options available

For more on PowerView, see opposite page

More Options. More Versatility. More PowerView®

We have the motorized solutions to meet all your home automation needs.

PowerView Automation

Battery-operated wireless solution using the PowerView® App or Pebble® Remote.

PowerView+™ Automation

Premium PowerView control option that utilizes a wired connection to both power and control window treatments.

PowerView AC Automation

An AC motor solution in the PowerView family that's perfect for larger window treatments. Uses the existing AC power in your home.
